

# APEING

THE OG DEGEN COIN

WHITEPAPER

## LEGAL DISCLAIMER

This document is provided for informational and educational purposes only. It does not constitute financial, investment, or trading advice, and should not be treated as such. Always conduct your own research and consult with qualified professionals before participating in any cryptocurrency activity.

The Apeing token is not a security, investment contract, or financial instrument. It holds no intrinsic or guaranteed value now or in the future. Apeing is a utility and entertainment token designed for community participation and engagement within the Apeing ecosystem.

Purchasing Apeing tokens does not grant any ownership, governance, or equity rights in the project, team, or brand. All purchases are final and non-refundable. Users are fully responsible for the security of their wallets and private keys. If a user loses access to their wallet or suffers a compromise due to sharing sensitive information, Apeing cannot be held responsible for any resulting loss.

Tokens allocated to a wallet cannot be canceled, reissued, or reassigned. Once purchased, the allocation is final and cannot be modified.

Apeing operates globally; however, users must comply with the laws and regulations of their own jurisdiction. Participation in the Apeing ecosystem is entirely voluntary and at the user's own risk.

By engaging with Apeing, purchasing tokens, or using the platform in any way, you acknowledge and accept all terms described in this disclaimer.

## INTRODUCTION

The market never stops moving. One moment, it's euphoric; the next, it's bleeding red. Everyone's got an opinion, a theory, a chart, until the moment fear hits. Then they all do the same thing: nothing!!

But the ones who win in crypto are never the ones who wait. They're the ones who APE! The ones who buy when others sell, who hold when others panic, who see blood on the charts and smell opportunity.

That's what Apeing is built on: motion, instinct, and the courage to act when the world freezes. Because every bull run is written by those who refused to hesitate. Every gain starts with a move nobody else was brave enough to make.

This token is for real degens who know how to APE and get rewarded for their conviction. The presale, staking tiers, and referral structure all serve one simple truth: fortune follows the bold.

The crypto market doesn't owe you patience. It only rewards movement. And when others stall, WE APE.

## WHY APEING SLAPS HARD

Apeing is built to function, not to impress. It's a clean, transparent system designed around participation, progression, and fair rewards. Every component, from the presale stages to the staking and referral programs, is structured to make engagement simple, consistent, and rewarding.

The presale operates through defined stages that advance weekly or when a stage sells out. This keeps momentum steady and ensures early participants are rewarded with lower entry points.

Apeing was created by degens who live and breathe this market, and we know every Chad has their own style of conviction and HODL game. That's why staking unlocks through powerful, progressive tiers. You decide how far to go, how long to hold, and how much to earn. The system is built for flexibility, precision, and direct reward, where confidence turns into gains.

The referral mechanism is intentionally straightforward. Buyers who use a referral code receive 10% additional tokens, while the code owner earns an equal 10% reward. This creates a balanced, transparent cycle of growth where both parties benefit from community expansion.

To keep engagement visible and competitive, two public leaderboards track performance across the ecosystem:

- **Ape Wars** ranks the highest purchasers each month.
- **Ape Referral League** highlights the strongest referrers by total raised.

The process is designed for clarity. A user joins a live presale stage, spends \$25 or more to unlock a personal referral code, and can access staking tiers once eligible. If a stage ends with unsold tokens, the burn function is triggered, permanently removing the remaining supply to preserve scarcity and integrity.

Every action has a purpose. Purchases contribute to Ape Wars, referrals update the Referral League, and winners receive rewards weekly. The outcome is a system that feels natural and self-sustaining.

Apeing stands apart because it delivers what most projects overcomplicate: a clear, working structure where every move matters.

## **THE VISION: MOVE FAST, HOLD HARD**

“We’re degens who move early, hold hard, and build wealth, not by chance, but by design.”

Apeing is built for degens, the people who believe in building something lasting through every market phase. We’re creating a system that proves one simple truth: bold conviction can shape generational wealth when it’s backed by real mechanics, not hype.

The goal is to evolve the degenerate spirit into something bigger: a collective that thrives on transparency, fair systems, and shared success. Every stage of the presale, every staking tier, and every referral reward strengthens that foundation.

This project is all about gains, because we believe in a life where Lambos aren’t dreams, they’re milestones. Together, we’re shaping a future where being early, being active, and being fearless truly pays off.

## **APES RUN ON ETHEREUM**

Apeing is built on Ethereum, the strongest and most established network in crypto. If you're building a project designed for real growth, real rewards, and real conviction, you build it where trust and liquidity already exist.

Ethereum gives Apeing the foundation it needs: stability, transparency, and access to the largest active crypto community in the world. It's a network proven through every market cycle, supporting billions in daily volume and thousands of verified projects. That reliability lets Apeing focus on what truly matters: rewarding the people who move early and hold strong. Every part of Ethereum aligns with Apeing's vision. The ERC-20 standard ensures instant wallet compatibility and simple transactions. Its decentralized structure guarantees that every presale stage, every staking reward, and every burn is verifiable on-chain, visible to everyone, and changeable by no one.

Liquidity is key to long-term success, and Ethereum delivers it. Its deep markets, strong exchange presence, and continuous global demand make it the most natural environment for Apeing to thrive. Early adopters gain the confidence of a secure foundation with the freedom to scale across major exchanges as momentum builds.

We're here to create wealth that lasts, not hype that fades. Ethereum gives us the ground to do it, solid, transparent, and built for degens who think long term.

## TOKEN INFORMATION

|                    |                                      |
|--------------------|--------------------------------------|
| Token Name         | Apeing                               |
| Ticker Symbol      | \$APEING                             |
| Blockchain         | Ethereum (ERC-20 Standard)           |
| Total Supply       | 16,750,000,000 \$APEING              |
| Presale Allocation | 40% (6,700,000,000 \$APEING)         |
| Listing Price      | \$0.01                               |
| Liquidity Lock     | 18 Months                            |
| Smart Contract     | Fully Audited & Verified on Ethereum |
| Staking APY Range  | 10% – 85% (Tier-Based System)        |
| Referral Reward    | 10% for Buyers + 10% for Referrers   |

## THE APE ECONOMY

Apeing is built on a fixed and transparent token supply of 16,750,000,000 \$APEING, designed to power growth while maintaining long-term scarcity. Every allocation exists for a purpose, ensuring that long-term holders, early adopters, and active participants all benefit from the ecosystem they help build.

### SUPPLY DISTRIBUTION

|                                                                                                                                                                                    |               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>Presale 40%</b>                                                                                                                                                                 | 6,700,000,000 |
| Reserved for the early believers who move first. Each stage of the presale fuels organic price discovery and ensures that conviction is rewarded from day one.                     |               |
| <b>Liquidity 10%</b>                                                                                                                                                               | 1,675,000,000 |
| Locked for 18 months to maintain trading stability and protect the market from volatility during the initial growth phase.                                                         |               |
| <b>Staking 30%</b>                                                                                                                                                                 | 5,025,000,000 |
| Dedicated to powering the tier-based staking system. Rewards are sustainable, transparent, and directly tied to participation — because long-term holders deserve long-term value. |               |
| <b>Referral Pool 15%</b>                                                                                                                                                           | 2,512,500,000 |
| Fuels the automatic reward engine that compensates both buyers and referrers, driving continuous expansion through genuine community engagement.                                   |               |
| <b>Community Incentives, Airdrops, and Burns 4%</b>                                                                                                                                | 670,000,000   |
| Supports outreach, strategic marketing, and discretionary burns that help manage supply while keeping growth balanced.                                                             |               |
| <b>Team 1%</b>                                                                                                                                                                     | 167,500,000   |
| Locked for one year, then vested gradually over six months — aligning team incentives with delivery, not promises.                                                                 |               |

Apeing's tokenomics work with purpose: clear rules, transparent structure, and rewards that love all the apes.

## THE APEING PRESALE STRUCTURE

This presale is designed so real ones ape in without any delays. The continuous price-change engine doesn't wait, pause, or slow down for anyone. Each stage moves fast, and every delay costs you the next best price.

The Apeing presale runs through 33 structured stages, each open for one week or until sold out. With every stage, the token price increases, creating a self-driven momentum where early participation is naturally rewarded.

There's no downtime between stages. As soon as one closes, the next begins, keeping the rhythm alive and the community in constant motion. It's a living cycle of opportunity: the earlier you act, the more you gain. If a stage ends with unsold tokens, the burn function activates automatically through the smart contract, permanently removing the remaining supply from circulation.

The presale covers 40% of the total token supply, dedicated purely to early adopters. Other allocations will operate separately, ensuring presale fairness and stability throughout the process. Meanwhile, the referral program and monthly leaderboards run in parallel, amplifying engagement and rewarding the most active apes.

Hesitation has a cost, and in this presale, it's paid by those who wait. The clock never stops, ape in before the next price does.

| Stage | Stage Name        | Allocation (\$APEING) |
|-------|-------------------|-----------------------|
| 1     | Banana Drop       | 150,000,000           |
| 2     | Chart Monkeys     | 200,000,000           |

## STAKE LIKE A CHAD

Apeing was built by degens who understand that every holder has a different game plan. Some stack slow and steady. Others go all in and never look back. That's why our staking system is designed to give every type of ape a fair shot at real returns.

The staking model runs during the presale, allowing early holders to earn before the token even lists. Rewards are paid from the dedicated staking pool as fixed annual percentage yields (APY), keeping the process clean, transparent, and easy to track.

### ACCESS BY TIER

Access to staking unlocks by tier. Each tier represents a different level of commitment, giving holders the freedom to choose how deep they want to go and how quickly they want to claim their rewards.

- **Chimp Tier – 10% APY**

Unlocks once a holder has purchased \$500 or more in \$APEING. Rewards become claimable 60 days after listing. Ideal for those starting their Apeing journey.

- **Monkey Tier – 25% APY**

Unlocks at \$1,000 in total purchases. Rewards can be claimed 30 days after listing, offering a faster return window for moderate holders.

- **Degen Tier – 50% APY**

Unlocks at \$3,000, with claims opening 14 days after listing. Designed for holders who stay active and see opportunity where others hesitate.

- **Giga Ape Tier – 85% APY**

Unlocks at \$15,000, with claims available on listing day. This is the top-tier reward level for those who go all in — the boldest apes who move early and hold with confidence.

After the token lists, Apeing will transition to on-chain staking, allowing holders to interact directly with the Ethereum contract. The logic remains simple: fixed rates, instant transparency, and full control. During the presale, holders can unstake anytime, keeping complete flexibility over their tokens and their strategy.

Apeing staking is a structure built for every kind of holder, from first-time participants to full-scale believers.

## APE REFERRAL LEAGUE

The Apeing referral system is built to reward growth on both sides. When a buyer completes a purchase using a referral code, they receive 10% extra tokens on that transaction. The code owner also earns a reward equal to 10% of the referred buyer's spend.

Referral rewards are drawn directly from the referral allocation and are distributed once purchases are confirmed. A personal referral code unlocks automatically after completing a purchase of \$25 or more.

All referral-driven purchases contribute to a public leaderboard known as the Ape Referral League. This board tracks the total amount raised by each code throughout the month and resets on the first day of every month. It runs in real time, allowing referrers to monitor their progress and adjust their strategy as they go.

At the end of each monthly cycle, the top performers receive additional rewards:

- **1st Place:** 10% of the total amount raised through their code, paid in tokens and claimable with their purchased coins.
- **2nd Place:** 5% of the total amount raised through their code, paid in tokens and claimable with their purchased coins.
- **3rd, 4th, and 5th Places:** Each receives a one-time 25% bonus code to use on their next purchase. Bonus tokens are claimable alongside purchased coins.

The structure is basic:

- Personal referral code unlocks after a \$25 purchase.
- Referred buyers receive 10% extra tokens per purchase.
- Code owners earn 10% of each referred buyer's spend.
- The Ape Referral League updates in real time and resets monthly.

The referral system turns community participation into a measurable reward, where every share, every code, and every new buyer strengthens both the ecosystem and the individual ape behind it.

## APE WARS

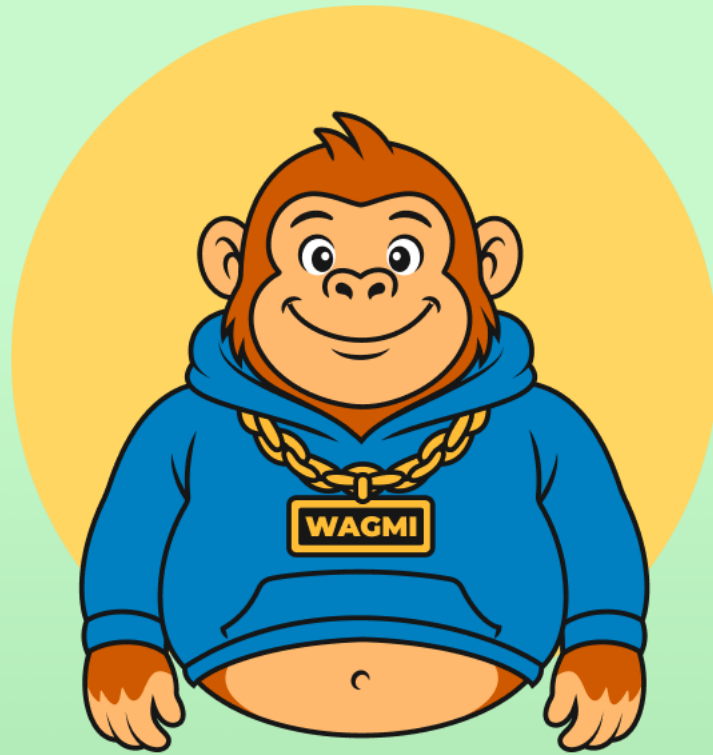

Ape Wars is a monthly competition designed to recognize and reward the most active and highest-value buyers within the Apeing community. The leaderboard tracks the total amount each participant spends during the month, resetting at the start of every new cycle to give everyone a fresh chance to climb to the top.

At the end of each month, the top three participants are crowned and rewarded based on their total purchases:

- **1st Place:** Receives an additional 10% on their total monthly purchases, along with a one-time 25% bonus code for their next buy.
- **2nd Place:** Receives an additional 10% on their total monthly purchases, plus a one-time 15% bonus code for their next buy.
- **3rd Place:** Receives an additional 10% on their total monthly purchases and a one-time 10% bonus code for their next buy.

With the leaderboard resetting every month, every holder has a fair chance to rise, compete, and claim the crown.

Ape Wars turns buying into a challenge, where consistency, activity, and determination translate directly into recognition and rewards.

## **LISTING PLAN AND MARKET STRATEGY**

Apeing will list at a price of \$0.01. The plan around that moment is built to protect early holders, support fair price discovery, and set the foundation for long-term trading.

Listing begins on a decentralized exchange on Ethereum. Liquidity is prepared in advance and seeded to match the first days of demand, so retail trades clear smoothly and spreads stay tight under normal conditions. Liquidity is locked for eighteen months, which gives the market a stable base while listings expand. Price discovery is allowed to work, but we manage the environment with care so the opening sessions are orderly rather than chaotic.

Centralized exchange listings follow once the first venue is stable and volumes look healthy. The target is three to five exchanges, with a strong push for a United States venue when timing and compliance align. This phased approach avoids dilution of order flow and helps each new venue add depth rather than noise. Before each new listing, we review book quality, daily volume, and liquidity depth so we scale only when the market is ready.

Fairness is at the center of the plan. There are no surprise changes to supply. Team tokens follow the one-year lock and six-month release. Referral and presale staking rewards are paid from their stated allocations. Unsold presale tokens are removed through the burn function when a stage ends. Every step matches what has been set out in this whitepaper.

Success is measured in practical signals that everyone can see. Healthy daily volume, clear order books, responsible liquidity growth, and consistent user engagement. By moving in stages, keeping promises, and communicating plainly, Apeing presents a listing strategy that is professional, responsible, and designed to last.

## ROADMAP – ALL GAS, NO BRAKES

The Apeing roadmap is built on clear steps and measurable progress. We start with a structured presale that includes staking and referral systems, followed by the listing phase, where liquidity and market-making go live from day one. Within weeks, on-chain staking launches on Ethereum, while exchange outreach continues with defined targets and full compliance checks.

Throughout the journey, we'll share data-backed updates on daily volume, liquidity depth, staking growth, and referral activity, ensuring full transparency and visible progress. Every stage is deliberate, achievable, and built to deliver results while maintaining long-term confidence.

### **Q3 2025 – Foundation**

- Project vision, tokenomics and ecosystem architecture finalized
- Smart contract development begins
- Website, dashboard and branding development
- Community channels launched (X, Telegram)
- Initial strategic partnerships secured
- Early community building and awareness campaigns

#### **Q4 2025 – Development & Security**

- Smart contract development completed
- Internal platform testing begins
- Independent smart contract audit initiated
- Audit recommendations implemented
- Website and dashboard released

#### **Q1 2026 – Ecosystem Preparation**

- Official whitelist registration opens
- Staking platform development completed
- Final security reviews and stress testing
- Strategic partnerships continue
- Marketing campaign preparations

#### **Q2 2026 – Whitelist Campaign**

- Whitelist registration continues
- Presale countdown campaign starts
- Final ecosystem readiness checks
- Community growth campaigns accelerate
- KOL, media, and exchange relationship building

#### **Q3 2026 – Presale Launch**

- Public presale officially launches
- Weekly presale stages begin
- Presale staking goes live across four tiers
- Ape Referral League launches
- Ape Wars monthly competitions begin
- Live dashboard tracks stage progress, referrals, and Ape Wars
- Ongoing marketing campaigns and community growth
- Weekly project updates

#### **Q4 2026 – Presale Growth**

- Weekly presale stages continue
- Global marketing campaigns expand
- Strategic partnerships announced
- Liquidity planning finalized
- Community campaigns and referral competitions continue

#### **Q1 2027 – Presale Completion & Launch**

- Final presale stages conclude
- DEX listing goes live
- Trading begins
- Market-making and liquidity management active from day one
- Trading volume and liquidity targets monitored
- CEX applications progress toward exchange listings

# ONE MORE THING

Built by degens, for degens, Apeing combines everything that makes crypto exciting: risk, reward, and real mechanics that work. Every presale stage, staking tier, and referral rewards is designed for a transparent system that turns conviction into value.

On Ethereum's solid foundation, Apeing delivers clarity where most projects deliver noise. It's a living ecosystem where every transaction, burn, and leaderboard update strengthens the community and the token's core economy.

This is not a coin for those who wait for permission; it's for those who know when to move.

Because in crypto, hesitation kills momentum, and conviction builds wealth.

We're not here to follow the market. We're here to APE, and the ones who APE together, rise together.

**APE HARD.  
HOLD STRONG.  
BUILD WEALTH.**
